

# 8W

## Fold Up Solar Panel

The 8w fold up solar panel is the most efficient way to keep a car, truck, boat, campervan, motorbike or caravan battery charged.

This solar-powered battery maintainer is ideal for preventing a car battery from going flat whilst parked at an airport or, maintaining and extending the life of a caravan battery whilst in winter storage.

The fold-up panel connects directly to a battery without the need for a charge controller (*unless the battery is smaller than 60A*).

Cable and connections are supplied with the panel to attach directly to the battery terminals via an in car 12v socket or crocodile clips.

Folding into a tiny 230 x 198 x 15mm package, the solar panel is easy to store in a glove compartment or, small cupboard. The panel comes with a 2 year worldwide warranty
